Friday, November 27, 2020

Tribal Elections
Saturday, October 31, 2020 at San Ildefonso Library

Food Box Distribution
Tuesday, November 10, 2020  
1:30pm to 4:30pm
Tuesday, November 24, 2020  
1:30pm to 4:30pm

Presidential Elections
Tuesday, November 3, 2020  
Tewa Center polling

Remember to vote 🇺🇸
**UPDATE ON TRIBAL ELECTIONS**

Due to unforeseen circumstances the 2020 Tribal Primary Elections will be held at the San Ildefonso Pueblo Library.

Primary Election Date: Saturday, October 31, 2020

Time: 7am to 7pm

Location: San Ildefonso Pueblo Library

**Everyone must wear a mask**

**Everyone must remain 6 feet apart**

**Only** voters may enter the building

PLEASE read and abide by these guidelines
October 29, 2020

Dear Honorable Governor Perry Martinez,

I write to inform you that based on epidemiological data collected by the New Mexico Department of Health (NMDOH), your tribal community is in a county with an elevated level of COVID-19. Average daily cases of 8 or more per 100,000 and test positivity 5% or greater over the previous fourteen days indicate that COVID-19 is spreading in the area and that there are likely still a substantial number of unidentified cases.

NMDOH is investigating all cases of COVID-19, but only good public health practices can stop community spread. Accordingly, I ask you to further emphasize the need for people living and working within your jurisdiction to:

- Stay home except for outings absolutely necessary for health, safety, and welfare
- Stay home if they are sick
- Wear a mask or face covering when in public and around others
- Avoid large gatherings and limit prolonged contact with other people (within 6 feet for more than 3 minutes) whenever possible
- Get tested if they have any symptoms of COVID-19 (fever, cough, shortness of breath, chills, repeated shaking with chills, muscle pain, headache, sore throat, congestion or runny nose, nausea or vomiting, diarrhea, and/or loss of taste or smell) or are a close contact of someone who tested positive in their infectious period

NMDOH will be increasing testing efforts in your area and the department would like to partner with tribal communities to ensure that testing and contact tracing is coordinated, and resources are maximized. To this end, the Indian Affairs Department is working with the NMDOH on this effort. I understand that some tribal communities are utilizing testing resources through other providers such as the Indian Health Service. However, if you would like to schedule testing through the NMDOH, please contact the appropriate NMDOH regional director to schedule testing. (See attached contact list).
You may also want to consider additional measures to mitigate the further risk of spread. The state stands ready to assist you in providing support to enforce these additional measures and restrictions to protect your community.

Additionally, our partners at NMDOH stand ready to provide any assistance or guidance needed to effectively contain this virus; please call (505) 827-0006 to request technical assistance on COVID-19 prevention and control. Additional resources can also be found at cv.nmhealth.org. Thank you for your partnership in the fight against COVID-19.

Respectfully,

Lynn Trujillo  
Secretary, New Mexico Indian Affairs Department
2020
US PRESIDENTIAL
ELECTION

Election Day is November 3rd!

Tewa Center, San Ildefonso Pueblo

7AM to 7PM

PLEASE REMEMBER WE ARE FOLLOWING COVID-19 GUIDELINES. CONTINUE TO PRACTICE SOCIAL DISTANCING AND WEAR YOUR MASK!
Legislative Update
November 2020

Tribal Elections
Reminder that the primary election for Governor and (5) Council Representatives will be held on Saturday, October 31, 2020 from 7 am -7 pm. The Election commission will be conducting a drive-thru voting system. We encourage any Pueblo member age 18 and over to vote.

RFP - Tewa Language Department
The Pueblo has published a RFP (Request for Proposal) to seek interested consultants to provide a language plan to be utilized in structuring a newly established Tewa Language Department here at the Pueblo. The RFP will be published in the Santa Fe New Mexican and is also available to view on sanipueblo.org website.

Wastewater Phase II
The Pueblo has submitted an application to the USDA to seek additional funding to continue the wastewater project. The Pueblo remains hopeful to receive funds to continue this important project.

San I Alert System
A reminder for those that are not participating in the Pueblo’s alert system to please fill out a form to receive important alerts and reminders. It is very beneficial for notifying tribal members of last minute food distributions and other announcements. The Pueblo can contact you through phone and/or email. Forms are available at the Governor’s Office and the Legislative Office.

If you have concerns, or suggestions, please contact us at the phone number below or wsc.tc@outlook.com.
The mission of DECP is to preserve and protect the natural environment and the cultural resources of the Pueblo de San Ildefonso, to assess risks to human health and welfare, both quantitatively and qualitatively, and protect the health and welfare of the Tribal community.

The Department of Cultural and Preservation (DECP) is conducting a survey to gather information from Tribal members on their input of the environment and natural resources of our Pueblo and surrounding areas.

We are preparing the survey packets to be distributed during one of the Community Food Distributions in the coming month. The survey will be issued one per household. The survey packet has more detail information on the purpose and use of the information, however please feel free to email Raymond Martinez at rmartinez@sanipueblo to set up a scheduled call for any questions.

Along with the packet, we hope you enjoy the tote as an incentive for your participation and taking your time to complete.

Thank you — Raymond Martinez, DECP Director

DECP is looking for tissue and bone samples from your 2020 harvested animals

This hunting season, DECP is asking Tribal members for donation of tissue and bone sample from their harvested animals to the department for analysis.

The donation would help the department in the monitoring of the Pueblos natural resources.

If hunters wish to donate a sample they may contact Raymond Martinez at 455-4127 or any of the Tribal Rangers. Thank you.

ATTENTION ALL HUNTERS!!

Hunter’s, please BE AWARE of your surroundings!!!

The Department of Environmental and Cultural Preservation (DECP) staff together with DOE and NMED staff will be monitoring wells located in the Sacred Area and Sandia and LA Canyons. We will be collecting samples in other areas around the Pueblo as well.

DECP would like to remind folks to keep a look out and be aware of staff in these areas during hunting season.
PART 2 of WILDFIRE SMOKE & COVID

Wildfires and Smoke

Over the last two decades, wildfires have become more frequent and intense across the western United States, a trend attributed to increased temperatures and decreased precipitation\(^1\). The resulting smoke is a mixture of many air pollutants, and is often characterized by elevated concentrations of fine particulate matter (or PM\(_{2.5}\)). Communities impacted by wildfire smoke experience high exposure to PM\(_{2.5}\) for days, weeks, or several months. Exposure to wildfire smoke can irritate eyes and respiratory tracts, worsen existing respiratory and cardiovascular conditions, and result in premature deaths.

Increased Risk of COVID-19

Recent studies suggest that wildfire smoke is associated with wintertime influenza outbreaks in Montana\(^2\) and biomass burning is associated with influenza cases in New York State\(^3\). In addition, a study on the severe acute respiratory syndrome (SARS) coronavirus outbreak in Beijing found that an increased risk of death is associated with increased PM\(_{10}\), which is comprised of PM\(_{2.5}\) and other large particles that are inhalable into the lungs\(^4\). Based on these studies, there is a potentially dangerous connection between air pollution from wildfire smoke and COVID-19.

Actions We Can Take

Developing cleaner air shelters or clean rooms can protect indoor air quality during a wildfire.

Communities often use cleaner air shelters to provide spaces—such as school gymnasiums—where people can shelter during wildfires or other extreme events. However, these spaces lead people, including elders and those with existing respiratory conditions, to congregate, which may increase the risk of spreading contagious diseases such as COVID-19. Communities using cleaner air shelters should implement practices to limit the transmission of COVID-19, such as verbal screenings and temperature checks before entering shelters, physical distancing and the use of masks within shelters, and proper cleaning and disinfection.

Creating a clean room at home—such as a bedroom with an attached bathroom—can reduce exposure to wildfire smoke while maintaining social distance guidelines. To create a clean room, keep doors and windows closed to prevent smoke from entering the room; run fans or an air conditioner to stay cool; use a portable air cleaner to filter the air; and avoid smoking, burning candles or incense, or other activities that produce air pollutant particles.

For more information, see the Centers for Disease Control and Prevention’s Considerations for Cleaner Air Shelters and Spaces.

For more information, see the U.S. Environmental Protection Agency’s Create a Clean Room.

2. Landguth EL, Holdenb ZA, Graham J. 2020. The delayed effect of wildfire season particulate matter on subsequent influenza season in a mountain west region of the USA. Environ Int. 139.

**Introduction**

This fact sheet provides a summary of the discovery and application of PFAS, emergence of known health effects, PFAS reduction, and environmental impacts. PFAS are a family of thousands of chemicals that vary widely in their chemical and physical properties, as well as their potential risks to human health and the environment. The unique physical and chemical properties of PFAS impart oil, water, stain, and soil repellency, chemical and thermal stability, and friction reduction to a range of products. These products have application in many industries, including the aerospace, semiconductor, medical, automotive, construction, electronics, and aviation industries, as well as in consumer products (such as carpets, clothing, furniture, outdoor equipment, food packaging), and firefighting applications (3M Company 1999a; Buck et al. 2011; KEMI 2015a; US.EPA 2017b). Additional information is available in the Guidance Document.

**Discovery and Manufacturing**

PFAS chemistry was discovered in the late 1930s. Since the 1950s, many products commonly used by consumers and industry have been manufactured with or from PFAS. Two major processes, electrochemical fluorination (ECF) and fluorotelomerization, have been (and are) used to manufacture PFAS substances that contain perfluoroalkyl chains: side-chain fluorinated polymers, perfluoroalkyl acids and polyfluoroalkyl surfactants (USEPA 2003b; Benskin, DeSilva, and Martin 2010; KEMI 2015b; OECD 2018). Table 1 summarizes types of perfluoroalkyl acids (PFAAs) produced by these processes. More than 600 intermediate processes have also been used to further produce certain PFAS and the associated final products.

<table>
<thead>
<tr>
<th>Manufacturing Process</th>
<th>Commonly Found Perfluorinated Substances</th>
<th>Potential PFAAs Produced</th>
</tr>
</thead>
<tbody>

<td>Branched &amp; linear PFCAs &amp; PFSAs</td>
</tr>
</tbody>
</table>

¹Fluoroelamer sulfonate, for example, may be found in aqueous film-forming foam (AFFF) sizes. ²Fluorocarbon organic acids, for example, 5,5 acid may be found in landfill leachate. ³Under certain instances, can produce mixture of linear and branched perfluoroalkyl carboxylic acids (PFCAs).
Emerging Health and Environmental Concerns

Awareness of Public Health Impacts Awareness of the presence of PFAAs can be attributed to occupational studies in the 1970s that found detections of some PFAS in the blood of exposed workers, and further studies in the 1990s that reported detections in the blood of the general human population (Buck et al. 2011). In recent years, the presence of several long-chain PFAAs (PFOA, PFOS, PFNA, and PFHxS) have been measured in the low parts per billion (ppb, equivalent to nanograms per milliliter (ng/ml)) range in the blood serum of almost all residents of the United States and other industrialized nations (Kato 2015; CDC 2018). These PFAS are present whether or not people were exposed in the workplace, likely due to the widespread use of PFAS in consumer products and industries (Kannan et al. 2004; Kärrman et al. 2006; Olsen et al. 2003). PFAS concentrations (especially PFOS) in human blood have decreased steadily since 2000 (ATSDR 2020a) with the voluntary phaseout of perfluorooctanyl chemistries by a major U.S. manufacturer. Laboratory studies using animals and epidemiological studies of human populations show that exposure to some PFAS may be associated with a wide range of adverse human health effects (USEPA 2016c, d; ASTM 2018e). Toxicity studies are discussed in more detail in Section 7.1 of the Guidance Document. More recently, the toxicology of other PFAS, such as fluorotelomers and shorter chain PFAAs, as well as replacement PFAS chemicals (such as GenX chemicals), have received increased attention (CONCAWE 2016;
Department of Education

SATURDAY OPEN LIBRARY

The library will be open on Saturday mornings November 2020, except November 28th, from 8:30 am to 12:30 pm.

Continue Saturday services will be dependent on patron use.

Laterns for Suicide Prevention

On Thursday, November 19th, we are asking you place a Lantern outside for everyone who has lost a loved one or almost lost a loved one to Suicide. Please contact the Library for more information or to receive a lantern.

School Supplies

We have school supplies available for everyone who may need it. We also have Storage carts and bins available for use.

Mental Health Awareness

During this time, please remember you are not alone. We are here for you; we are also encouraging you to use these resources:

https://suicidepreventionlifeline.org/
National Suicide Prevention Lifeline
1-800-273-8255

NOVEMBER SCAVENGER HUNT

During the week of November 16th, we are holding a picture scavenger hunt.

Please contact the library for more information or to be signed up.

ROCK YOUR MOCS!

Join the Education Department and Rock your Mocs!

November 15th, 2020!
Department of Education

Red Ribbon Week

Thank you to everyone who participated and made this year a good one!

House Decorating Contest Winners:
1st place: Isabel Gonzales and Family
2nd Place: Rose Naranjo and Family
3rd Place: Jennifer Kaniatobe and Family

Native American Heritage Month

November is Native American Heritage Month, or as it is commonly referred to, American Indian and Alaska Native Heritage Month.

LIBRARY CLOSURES!

November 11, 2020 in observance of Veteran’s day

November 26th and 27th in observance of the Thanksgiving Holiday.

Costume Contest Winners

0-10 Years Old
1st Place-Jaslene Martinez
2nd Place-Lorenzo Gonzales
3rd Place-Korra Naranjo

11-18 Years Old
1st Place- Madison Gonzales
2nd Place-Savina Aguilar
3rd Place- Andrieta Gonzales

19 years and up
1st place- Jordan Gonzales
2nd place- Valerie Aguilar
3rd place- Katerie Martinez

Pumpkin Carving Contest

1st Place- Melanie Gonzales & Family
2nd Place- Valerie Aguilar and Family
3rd Place- Charlene Martinez and Family

More information is available on our webpage including the library catalog, event calendar, forms, homework help links including our online encyclopedia and so much more!

www.sanipueblolibrary.org
High School Seniors/College Students
FAFSA Night

When:
November 10th, 2020 and November 12th, 2020

Where: Learning Center

Time: 5:30pm to 7:00pm

Please schedule an appointment in advance!

Please bring 2019 Federal Taxes

Contact Library for additional questions.  
505-455-2635
NATIVE AMERICAN SPIRIT WEEK

NOV 15-19 PUEBLO DE SAN ILDEFONSO

SHOW YOUR NATIVE PRIDE AND SUPPORT

NOV 15 SUNDAY

ROCK YOUR MOCs

Join the Education Department in Rocking Your Mocs.
Send us a picture of you and/or your family rocking your Mocs!

NOV 16 MONDAY

Scavenger Hunt

We are hoping to tell a story with pictures. Pick up your camera phone, snap a pic from the list and send the pictures to us for an incentive. Contact Aaliyah for more information!

NOV 17 TUESDAY

Dress Your Best

Today, in honor of our ancestors, we are asking that you put on your best dress or ribbon shirt, your most beautiful jewelry and send us your best pictures.

NOV 18 WEDNESDAY

Family Recipe

Everyone has a family recipe they cherish. Cook yours and bring it to the library. Contact us for more information.

NOV 19 THURSDAY

We Are San I Strong

Thursday Night, we are asking that you display your lantern and a yellow ribbon in honor of every person we have lost to Suicide. Please display the lights to let the community know we are strong.
Community Meeting on Education

In Coordination with Governor, Council Education Committee and Education Department

Monday, November 16th, 2020
Starting at 5:10pm
Join the Zoom Meeting
Meeting ID: 422 446 7246
Passcode: sanied

We want to check in to make sure everything is running smoothly.
JOIN US
Morning tea with PrettyWater!!
Family Advocate serving the whole San Ildefonso Community

Every Wednesday 9:00 a.m. - 11:30 am
(November 4th, 11th, 18th 25th)

Via ZOOM 645 515 8249   PASSWORD: ICWA

Something on your mind?
Unsure about the role of a family advocate?
Looking to more family resources?
Needing to vent, laugh, cry, and yell whatever about ANYTHING?

Everyone is welcome to sign in for a chat. Normally, I’d offer you tea too, but Zoom, as you know, sets the limits these days. Sorry!
**Roasted Nicola Potatoes with Rosemary, Garlic, Pepitas and Coriander Seeds**

**Ingredients**
- 1kg Nicola potatoes, cut into thick wedges
- 3 tablespoons extra virgin olive oil
- 1 teaspoon rock salt
- 3/4 teaspoon freshly ground black pepper
- 1 clove peeled garlic, finely chopped
- 1 tablespoon chopped fresh rosemary leaves
- 1 tablespoon coriander seeds
- 1 tablespoon pepitas
- 1 sprig of Rosemary, broken into small pieces
- 8 cloves garlic (unpeeled)

Preheat the oven to 375 degrees.

In a large bowl, mix the extra virgin olive oil, pepitas, rosemary, coriander seeds, salt, pepper, and garlic; add the potatoes and toss until well coated. You may also place ingredients in a plastic container with lid for tossing if preferred.

Transfer content to a shallow baking pan, spreading out into one layer.

Roast in the oven for 40 minutes to 1 hour or until browned and crisp. Flip over potatoes while roasting to ensure even browning. Test the tenderness of the potato with the tip of a knife.

Remove pan from the oven, add extra seasoning to your liking, and serve hot.

**Tip:** To use sprigs of fresh rosemary in cooking, strip the leaves from the main branch by holding the tip and pulling down on the leaves in the opposite direction they are growing. Chop the leaves before adding to a recipe.

ENJOY

---

**Roasted Pumpkin Seeds**

*After carving the pumpkins, turn the scooped-out seeds into a healthy snack. This is a great opportunity to explain to your kids where seeds come from. Roasted pumpkin seeds are a yummy annual snack, and they’re high in zinc and other minerals, amino acids, and Vitamin K.*

1. Preheat your oven to 350 degrees. Spread aluminum foil over a baking sheet.
2. Dig your seeds from your pumpkin and put them in the strainer. Carefully rinse them under cold running water, and separate the strings of pumpkin flesh from the seeds. The stringy pieces can go in the compost or the trash.
3. Spread the seeds across the baking sheet, and spoon olive oil over them. Then sprinkle salt.
4. Put the baking sheet in the oven for 15-20 minutes. Take them out when they are golden brown and crunchy. Let them cool.
R&J Rodriguez Farm Nicola potatoes.

These yellow fleshed potatoes have a low glycaemic index rating. In one study, researchers put seven potato varieties of these, they found that the Carisma potato had a GI of 53, making it the only one of the group to be classified as low-GI.1 The Nicola was the next highest at 69 GI, falling into the medium-GI category. Often, the sweet potato is rated with a GI in the mid-40s.

Roasted Nicola Potatoes with Rosemary, Garlic, Pepitas and Coriander Seeds

Ingredients

1kg Nicola potatoes, cut into thick wedges
3 tablespoons extra virgin olive oil
1 teaspoon rock salt
3/4 teaspoon freshly ground black pepper
1 clove peeled garlic, finely chopped
1 tablespoon chopped fresh rosemary leaves
1 tablespoon coriander seeds
1 tablespoon pepitas
1 sprig of Rosemary, broken into small pieces

8 cloves garlic (unpeeled)

Method

Preheat the oven to 375 degrees.

In a large bowl, mix the extra virgin olive oil, pepitas, rosemary, coriander seeds, salt, pepper, and garlic; add the potatoes and toss until well coated. You may also place ingredients in a plastic container with lid for tossing if preferred.

Transfer content to a shallow baking pan, spreading out into one layer.

Roast in the oven for 40 minutes to 1 hour or until browned and crisp. Flip over potatoes while roasting to ensure even browning. Test the tenderness of the potato with the tip of a knife.

Remove pan from the oven, add extra seasoning to your liking, and serve hot.

Tip: To use sprigs of fresh rosemary in cooking, strip the leaves from the main branch by holding the tip and pulling down on the leaves in the opposite direction they are growing. Chop the leaves before adding to a recipe.

Go Green on Halloween:
Compost Your Pumpkin!

Begin with the Bin
BE SMART WITH YOUR RECYCLING & GARBAGE
www.BeginWithTheBin.org

Carving a jack-o’-lantern is a time-honored Halloween tradition. More than 48 percent of Americans say they plan to buy and carve a pumpkin this year.

But what happens to all those millions of spooky gourds on November 2? Likely, they will end up in the trash. Americans generate roughly 76 million tons of yard trimmings and food waste every year.

This year, instead of tossing Jack, turn him into something useful — compost for your garden! Here’s how:

1. Remove any candles, wax, aluminum foil or other items from the pumpkin. (Remember — if it was never living, it can’t compost.) Also make sure to remove any remaining seeds — they may later grow into unwanted new pumpkins!

2. If you don’t already have a compost pile, find a shady spot in your garden to place your hollowed-out pumpkin.

3. Smash it up! Breaking the pumpkin into smaller pieces increases its surface area and will help it turn to compost faster.

4. Loosely cover the pumpkin pile with carbon-rich compostable materials like leaves, sawdust or wood chips. The covering will protect the pumpkin from insects and pests while airing it out to ensure a balanced breakdown.

Why Compost?

- Food waste makes up the largest component of household trash headed for landfills or waste-to-energy plants.

- The U.S. EPA estimates that only 2 percent of all food waste was recovered for composting in 2011. Compared with recycling rates for paper and paperboard (more than 50 percent was recycled), that’s a drop in the bucket.

- Composting reduces greenhouse gas emissions. According to the EPA, composting almost 20.7 million tons of yard waste and food waste in 2011 saved more than 1.9 million tons of carbon dioxide equivalent emissions — the same amount emitted by more than 400,000 cars in a year.

- Composting also reduces global impacts from climate change by decreasing the emission of methane, a potent greenhouse gas.

5. Let Mother Nature take over! In a few weeks, your pumpkin will transform into nutrient-rich compost. Spread it around the plants in your garden for a special treat during the winter months.
